Glowbuggers and Anchorites,

I dragged home an RT-1-B transmitter and need info: schematics, manuals.

I'ts in two parts, power supply and RF deck, with interconnecting cable,
covers 3 to 30 mc, and has a 2E26 driving a 4PR60 final.

Manuals, tales, or other info welcome.

Thanks.

Well, amazingly, there were some folks that showed up for the First International Boatanchorite/Glowbuggite Firebottle Rallye, and there were some interesting rigs running. So, all chops report in your scores so's T.O.M. can tally up the bananas and see who is on first.

I made 7 qso's, but was using commercial boatanchors (RAL/ET-8019A/BC-375/BC-348/HW-16), so my point multipliers were nil. Sandy was running a 1929 style TPTG rig with National SW-3 receiver and made some fine points. I heard KF5N, VE3RP, AD4YH, W3GF, and others in there, and some folks mentioned that they tried but were not able to make contacts. I even tried 40 meters during the day, but not much was going there, and the NMN Armed Forces Day QSOX was 7051, so I let them have it on Saturday. Sunday was nil on 40 daylight. I did hear VE3RP in Monday morning, but could not work him on the HW-16. He was chasing a PY stn then.

I know the announcement was late in coming, and it really was a spur of the moment thing last Thursday, but I am glad we had some folks show up and really put their Boatanchors to use on the air! So, in my estimate, the First International Boatanchorite/Glowbuggite Firebottle Rallye was at least a partial success, to all that made the QRG.

73/ZUT DE NA4G/Bob
